"The Ottawa Spotlight"

A Weekly Review of National Affairs
By William Eggleston

Ottawa, July 15th.—There is not much doubt that the destiny of the world these days lies in the keeping of five or six men, Hitler, Chamberlain, Mussolini, Roosevelt, Churchill and Stalin, and that it would not take much to set off a catastrophe. With this in mind, the recent travels of our premier are not without some world significance. He held private conversation with Roosevelt before he went to London and unquestionably carried a message to the British leaders from the White House. He has at tempted, without much success so far to act as sponsor of an Anglo-American trade agreement. Then he visited Germany, and in a sense must be regarded as an unofficial ambassador between the British Commonwealth and Germany. Now he has returned to Canada. It is not to be expected that he will reveal everything that went on. There will be much more fairly about the little he does say.

Britain's policy is at last fairly clear. She has decided that the only way to meet the needs of the world is a bigger mallet fist. She is going to make herself so strong that she cannot be ignored. This will involve alliances. Just now it is told she is especially anxious for renewal of friendship with the United States. Hence the likelihood of a trade agreement.

Want Equal Concessions

The British interests which have prospered by the tariff, doubt, will walk against the U. S. tampered with the Imperialists, such as Amery, don't want the Ottawa agreement to be inspired. Mackenzie King, however, and to a lesser extent, Dunning, are prepared to make concessions about their tariff privileges in the British market, in the general interests of world trade and peace—provided that in exchange for what they give up, they will get something equally promising.

To come down to Canada, Canada will agree to lower British duties against U. S. fruit, lumber, meats, etc., and the U. S. will in turn admit Canadian cattle and fish at a lower figure. The only fly in the ointment here is the Nova Scotia and B. C. apple grower, who shows no chance of picking up in the U. S. what markets he loses in Britain.

That threat of a lowered apple preference—made a good Conservative campaign issue in Nova Scotia, but apparently it was not serious enough to affect the voting muck.

Will Mackenzie King and Roosevelt confer again? Some commentators are saying that they probably will. The Anglo-American trade agreement is still in embryo. There is another consideration, namely, Gold.

A few years ago, there was alleged to be a shortage of gold. Now, at its depressed price, it is capable of doing more work per ounce. Also, vast new supplies have been uncovered. Normally, this would result in a great inflation in prices. There have been moderate rises in prices, but nothing spectacular. What has prevented the rise?

Roosevelt's Gold Policy

The experts say that Roosevelt has "taken the rap" by continuing to buy all the gold offered her at the standard price of \$35 per ounce. This has been a great blessing for the gold mines of Canada and South Africa. Will he continue to do so? If he suddenly calls a halt, what happens to the price of gold, and to the big gold producing countries? It takes a more erudite economist than myself to answer such questions. But it seems clear that the layman that President Roosevelt has quite a lever in gold. He may decide to use it in getting world reductions in tariffs. Some critics of the U. S. contend that the United States wants to sell abroad, but won't take goods in exchange, and that her customers are forced to pay the only other way, in gold or in loans. Loans being out, for the time being, that means payment in gold.

Is this true? The trade figures indicate that the United States is now developing an unfavorable balance of trade. Still the gold pours in. Of course, at \$35 an ounce, the gold producing countries are very happy to get rid of it. There is always the fear that the price may be lowered again, but because of her vast interests in gold mining, and because of her stake in international trade, Canada is vitally concerned in the Roosevelt Chamberlain negotiations.

ANNOUNCEMENT

Mr. and Mrs. William Gile of Carleton Island announce the marriage of their daughter, Bertha Vera to Irvin M. Roycroft of Blackie. The wedding will take place at the bride's home on Friday, July 24th. A reception will be held at the Carleton Community Hall at 8.30 p.m. to which all friends of the family are cordially invited.

DRUMHELLER VS. STRATHMORE

A friendly game of golf was played off Sunday when a party of about 20 fans came over from Drumheller to test the skill of the local players. The visitors were led by their prize—winner, the Strathmore club house. Lunch was served by the ladies. The weather was ideal and a good time was enjoyed.

THE WORLD OF WHEAT

By H. G. L. Strang

Director "Crop Testing Plan"

What is Western Canada's most valuable natural resource?

Some say the top six inches of soil, some the sunshine or the hot days and cool nights, others the coal, copper, lead and zinc, and the oil wells. Still others plump for the timber of the forests and of the fish in lakes and streams.

For in 1937 I suggest that the 12 inches of rain which on the average falls during the autumn and growing season months over Western Canada, form our greatest asset. It is the most valuable it can only be fully appreciated when it fails to occur, and so when we suffer from drought, consequently in turn from poor crops, or worse still, from complete crop failure.

Unfortunately, only 50 per cent of this most precious rainfall, namely any it is, is available to the wheat plant; 25 per cent is lost by evaporation—this probably is under the average—10 per cent also is lost by weeds which it has been calculated, decrease the yield by about 35 per cent. Chronically, then, it seems that one of the best ways to increase crop yields, which would actually be the equivalent of increasing the rainfall, is to eliminate the weeds.

The drought consumes us. There on high

the hills are parched, the streams are dry.

The drought consumes us. Still I strive.

And will not leave while I survive.

—Chinese poem about 900 B. C. from the Shi King Collection of Confucius.

Devastating droughts, as we can perceive from this ancient Chinese classic, is no new thing. Struggle with a party of about 20 fans came over from Drumheller to test the skill of the local players. The visitors were led by their prize—winner, the Strathmore club house. Lunch was served by the ladies. The weather was ideal and a good time was enjoyed.

For six, in some places eight, long dry years, the farmers of our Saskatchewan have demonstrated to the world their determination to strive. Each spring, with gradually diminishing resources, these courageous people, in keeping with the ancient spirit as shown in the Chinese classical poem, have needed and cultivated the land with faith and hope. Unfortunately to survive in farming requires more than faith and hope. Material resources which cost money are necessities too. In the dry areas many have now come to the end of their material resources. Let us hope that these splendid farmers—these most courageous Canadian citizens—may be saved not only for Western Canada, but for Saskatchewan itself, by the help of newly established sown fellow farmers in known good rainfall areas of the Province.

Local News Items

Mitchell Cartwright is at present in England with the youth contingent of the Oxford Group Team, where he will remain for some time.

Mrs. Brady was holidaying in Calgary last week.

Renald Wright is spending two weeks in Edmonton attending the Amateur Radio Convention. Known among the fans as the Hamfest.

George Anderson has returned to work at the Western Departmental store.

Burns Walls is going to accompany Max on a visit to his brother Winslow in Dillon, Cal. was turned back at the border, the authorities not allowing his entrance into U. S. Max also had some difficulty in persuading them he was merely a tourist for the summer months, but they finally accepted his credentials and allowed him to go on.

Ada Wright has secured employment assisting in Mrs. P. L. Hyde's home in Calgary.

Burns Walls spent Saturday in Strathmore with his brother Wilson.

Mr. and Mrs. D. A. Perry left Wednesday on their annual vacation. The plan to tour through Southern Alberta visiting friends in Medicine Hat, Calgary, Edmonton and Calgary.

Born to Mr. and Mrs. Chris Ackman July 9th a baby girl. Dr. O'Brien in attendance.

Mrs. Marcum has as her guest Mrs. Earl G. Garner and son Gilbert of High River.

Born to Mr. and Mrs. Carl Wilde of Carleton Place July 12, twin boys. Dr. Little in attendance.

Little Richard Palardy, 19 months old escaped drowning in the canal recently when he wandered away from his older brothers and innocently walked into the canal waters where he was not so well known. His father, Helen Bennett seeing the child floating on the water ran to call her mother who rescued the little fellow and returned him to his mother, thereby averting what would otherwise have been a very sad accident.

Would-be thieves visited Charlie Keeling's garage Monday night. They tried the car, but could not get into it. Keeling's dog, which was turned to the truck, which they drove as far as the Blackfoot Trail School. Here some of the mechanism went wrong, the culprits tried to win some parts but not succeeding they abandoned the car by the road side. Constable Carter is on the lookout for any clue. Other cars in town were tampered with the same night.

Dr. O'Brien who supplied for Dr. Giffen left Monday morning for Regina where he will enter the hospital to intern for a year.

Mr. Pierson, Leonard Van Tighem, and Sonny Gray will go to Brooks Sunday to compete for the Calgary Herald Golf Trophy.

Mrs. Quirin of Calgary is visiting some time with Mr. and Mrs. Geo. Quirin.

Summer school is being conducted in the Sacred Heart school. The Ursuline Sisters from Calgary, with a large number in attendance.

Mrs. Hyatt and Miss Violet returned Sunday from the coast, bringing Miss Waterman of Calgary who will be their guest for some time.

Mrs. Alf Carlson of Brooks has returned home after spending a couple of weeks with Mr. and Mrs. Giffen.

Mrs. T. S. Hughes and Wanda Knapp returned Friday last from a delightful week at Sylva Lake, guests of Mr. and Mrs. Porteous.

Mrs. Wiley and baby son, the over guests of Mr. and Mrs. family during the first of the week.

Dr. and Mrs. John Giffen returned Saturday from their honeymoon, and are being welcomed by their many friends.

Merle Baker is staying with Iola Burns for some time.

Burns Walls is working in a Cardston garage for the summer months.

Mr. H. E. Gray, Archie and Frances are on a motor trip to the coast and U. S. points.

Mrs. W. D. MacLean and daughter Ky and Miri are visiting the former's mother, Mrs. Moore.

Mrs. W. S. Patterson and small daughter have returned from a three week's visit at the coast.

Mr. Brooker and son, Gordon of Claresholm were Sunday visitors at the Keeling home. John Keeling returned to Claresholm with them where he will enjoy a couple of weeks' holiday.

The Main Street show, at Hillside Theatre, July 23rd and 24th is a particularly good picture. Do not miss it!

Miss Marjorie Poirie left Saturday last for Vancouver where she plans to take a course in Beauty Culture.

A party comprising Mr. and Mrs. H. H. McEwen, Mr. and Mrs. L. Campbell, Mr. and Mrs. Brown, Mr. McFarland and brother from Regina and their two sons, motored to Banff Sunday. They say that Lake Louise is still in the hands of the snow, and that the scenery is beautiful.

Mr. and Mrs. Shrimpton, Helen and Douglas spent the week end in Banff and Lake Louise.

Douglas Shrimpton has joined the staff of the Strathmore Trading Co.

OFFICIAL NOTICE MUST NOT BE NEGLECTED

At Strathmore before Magistrate J. M. Wears Monday, July 12th, J. P. Voornman was charged by weed inspector J. Keeling with neglecting to destroy weeds after being notified to do so.

J. L. Boon, Field Supervisor for the Dept. of Agriculture stated that the Dept. do not wish to press this case due to the fact, that Mr. Peterson a weed inspector, but made it quite clear, that should negligence be shown in this case, any cases in future would be dealt with in accordance with the provisions of the Weeds Act. The purpose of this charge is to draw the attention of the tax payers in M. H. Valley that official notices must be respected.

HOME CURING OF PORK

(Experimental Farm Note)

The home curing of pork for summer use should be done before warm weather comes. The largest pieces, such as hams, shoulders and loins are most suitable for curing and the small pieces may be consumed fresh, made into sausage or given a light cure for early use. Whether brine or the dry cure is to be used the main curing ingredient is salt and if necessary, curing may be done with salt alone. A little brown sugar sweetens the meat and prevents hardening and gives the meat a nice color.

For a dry cure, provide for each hundred pounds of pork; eight lbs. of salt, three lbs. of brown sugar and two ounces of saltpetre. Mix well and rub each piece thoroughly, using about half of the mixture. Fast in a clean cork or wooden barrel with skin side out. In about a week remove all pieces from the barrel and pack closely in the mixture. Remove from container every seventh day and repack.

If brine cure is preferred, use for each hundred pounds of pork; ten lbs. of salt, three pounds of brown sugar, two ounces of saltpetre and five gallons of water. Mix dry ingredients and rub each piece well and pack closely in a container as in dry curing. The mixture left may be dissolved in the five gallons of water and poured over the meat. Use a clean board and stone to hold meat below surface of brine. Remove from brine every seventh day and repack as in dry curing. If meat is closely packed the five gallons of brine will be sufficient to cover the meat.

THE CALGARY STAMPEDE

The Calgary Exhibition and Stampede has become a thing of history as most every day it went over the top in every way, the attendance is taking some 220,000, 4000 more than last year.

Like the exhibition, all round was the best of its kind, is admitted by all and unsuited praise is due the Exhibition management for their successful and interesting circus in arranging and looking after the thousand and one details necessary.

The presence of His Excellency the Governor General and Lady Tweedsmuir, added much interest and Friday will be a red letter day in the memory of 17000 school children.

The Grand Stand entertainment was very fine, the exhibits interesting and excellent. And for the stampede events in particular, whether one desires that form of entertainment or not, it must be admitted that manifestations of courage, speed and alert thinking were shown continuously. A spirit of sympathetic camaraderie among the cowboys is a tradition.

Most assuredly these spectacles do give evidence of an affable and excellent race.

POOL RATHER THAN WHEAT BOARD GETS MURRAY'S APPROVAL

Wheat.—With a score of proposals for extending grain markets and after some discussion before it, the Wheat Board has decided to support the proposal to extend the market to the United States. It is known as the Wheat Board. This is a perennial weed and from information we have been able to obtain it has given considerable trouble in different parts of the Board. It is hoped that the Board will be able to get in touch with the local weed inspector, H. Peterson.

Major victory was James H. Murray, Winnipeg, chairman of the Canadian Wheat Board since December 2, 1931. Mr. Murray said Canada must protect the products of other countries if she is to sell her wheat. Among other things for loss of markets, he said were increased production in normal by importing countries and disinclination of Canada to meet the competition of other exporting countries in recent years.

Canada's normal production could not be marketed abroad, no matter how the marketing system, unless trade relations with principal wheat importing countries were improved. For the marketing system, unless trade relations with principal wheat importing countries were improved.

Advertising and publicity work being carried out by the board should be over by a wheat institute endorsed by the federal government and free of politics. He hoped the inquiry would make some recommendation for development of overseas markets.

The policy of the board which he headed, said Mr. Murray, was to offer to the world markets on continuous in such quantities as the market could take reasonably. The board sold wheat to any and all it considered the price satisfactory.

LOCALS

Wedding bells will ring soon for a popular young man of Strathmore and the house on 24th street lately vacated by Mr. Spauld is now being renovated in readiness for the homecoming of the happy young couple.

Alberta North, R. N. after holidaying at home for ten days, returned on Friday to Moscow, Idaho to resume nursing in the Grimsen hospital.

IRRIGATED LAND

In a comprehensive article written by Dr. L. D. Nesbitt and printed in the Brooks Bulletin of last week, the value of irrigation is stressed in very forcible terms. The average production of wheat per acre in Southern Alberta is 7 bushels. In the Eastern Irrigation district it is 22 bushels.

E. L. Gray believes that irrigated districts are a necessity to all agriculture. They provide a reserve of cattle fodder each year. It has been estimated that the growing of alfalfa and drying yields of this season that a plan of water conservation in the future will be of great value. The monster community picnic to be given at the end of July 20th will be addressed by:

L. B. Thompson, Supt. Swift Current Experimental Farm—Carrington

ACIDIZING OIL WELLS

Calgary, Alberta. The formation of a Canadian acidization company for the treatment of Alberta oil wells, and the opening of a plant in a few weeks at Okotoks is announced by Mr. Ray Austin of Shelby, Montana. The company—Jewell Chemical—is a subsidiary of the Dow Chemical Company of Midland, Michigan. It will be operated by Canadian, Mr. Austin said, and a Calgary man, Mr. Gordon Webster, chemical engineer, will eventually be placed in charge, ending a course of practical experience arranged for Mr. Webster, Mr. W. W. Leav of Midland, Michigan will be in charge at Okotoks.

WELCOME RAINS

The rains of the past few days have helped the late grain and pasture very much. With prospect of more to come everyone is feeling more hopeful.

WOMAN'S INSTITUTE

The regular meeting of the Women's Institute will be held at the home of Mrs. Macleod's Wednesday evening July 21st at 8 o'clock. A full attendance is desired.

A NEW WEED

A new noxious weed is now making its appearance and is causing the farmers considerable alarm. It is known as the Hairy Creeper. This is a perennial weed and from information we have been able to obtain it has given considerable trouble in different parts of the Board. It is hoped that the Board will be able to get in touch with the local weed inspector, H. Peterson.

A SCOUT MISDEMEANOR AS MUCH NEWS AS A DOG BITING A MAN

Just as it is news when a man bites a dog so it is news when a dog bites a man. This is a scandalous crime, declared Magistrate S. B. Arnold of Chatham, Ont. The magistrate stated that during his years on the bench he had never had a Scout before him charged with a misdemeanor.

COMING EVENTS

Remember the Big Sports Day at Rockford, Wednesday, July 23rd. Fun, Frolic and interest for all ages. Keep this date clear for Rockford.

All roads lead to Crawford School Station, July 22nd. Big night of fun and frolic for young and old alike. Shooting gallery and bingo ice cream cake, etc. Lovely Indian Banquet will be given free to holder of lucky ticket.

UNHAPPY RUSSIA

Twenty years after the revolution, the outside world, thought a consistent pattern of self-contained and progressive plan for the nation, on an upward trend, was being overtaken.

That same outside world is now to read of the mass executions with out trials, leaders of the Red Army and other officials shot in cold blood on countless occasions.

Systematic suicides of avaricious leaders, a calculated nation-wide rape, the disgrace of key figures in the secret service, etc. etc. The only thing certain is that vast changes are taking place under the police state of Soviet Russia.

Dictator Stalin's rule is becoming so tyrannical, that millions of Russian citizens of high and low degree are living in constant fear of what may next happen.

PAPER ON PARADE

The Standard is in receipt of a pamphlet gotten up by the Howard Smith Paper Mills Co. Ltd. It, like the Standard published by this firm, is a work of art and demonstrates the perfection attained by modern printing on good paper.

The paper industry is one of Canada's leading features and the story of its development makes very interesting reading.

WILD MUSTARD PROBLEM

The artist may rave about the riot of colour displayed by the fields of the countryside in June, an enthusiasm not shared by the farmer who deplores the golden hue of the wild mustard bloom which dominates the field and foretells a serious diminution in yield of grain. Wild mustard is difficult to eradicate, as the seed may lie dormant in the soil for years, awaiting conditions favourable to its germination. The weed is a real problem in Ontario and in many sections of the Prairie Provinces where it is spreading rapidly. Attempts to control it by spraying with a dilute solution of sulphuric acid, when the grain is about four inches high, have met with some success experimentally, but special machinery is required, and sulphuric acid is not a nice substance to handle. Dusting with finely pulverized cyanamid has proved effective against wild mustard in Europe, and there seems to be no reason why it could not be used successfully in Canada for the same purpose. It is necessary that the cyanamid be dusted on when the foliage is damp, in order that the substance may adhere to the rough leaves of the weed. Used in this way, cyanamid plays the dual role of herbicide and fertilizer, since it contains 22 per cent of nitrogen to give the grain a boost.

WILDERNESS GIVES WAY TO HUGE NEW AIRPORT

Newfoundland Airport—A group of almost 1000 sun-browned men and \$500,000 in machinery are waging a successful battle with nature here, as they lay a great airport out of virgin timberland in Newfoundland's bid for trans-Atlantic air-route recognition.

Under direction of Resident Engineer T. B. Woodruff of Toronto, one of the builders of St. Hubert's airport outside Montreal, shifts of men and machines work 24 hours a day, cutting, clearing, ripping, levelling and grading over an 800 acre gash in the dense timber country 215 miles northwest of St. John's by rail and about 120 miles from the capital by plane.

A mile to the east, three towers are rising from another man-made break in the forest where a wireless station with the most powerful and modern equipment available will guide huge planes on their trans-ocean dashes.

CHRISTIAN SCIENCE

At all Christian Science churches next Sunday, the subject of the Lesson-sermon will be "Life." The following is out of the Scriptural quotations contained in the Lesson— "Verily, verily, I say unto you, He that heareth my word, and believeth on him that sent me, hath everlasting life, and shall not come into condemnation; but is passed from death unto life" (John 5:24). One of the correlative passages from "Science and Health with Key to the Scriptures" by Mary Baker Eddy, is as follows (page 487): "Life is deathless. Life is the origin and ultimate of man, never attainable through death, but gained by walking in the pathway of Truth."

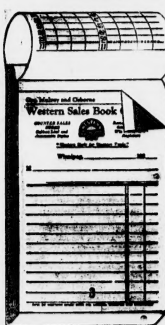

both before and after that which is called death. The understanding that Life is God, Spirit, Angelic, on days by strengthening our trust in the deathless reality of Life, its almightiness and immortality."

MAN MUST STEP LIVELY TO CHECK INSECT MENACE

Certain insects are commended as examples of industry, the busy bee, for instance, and those of us who are susceptible are told to go to the aid, putting it mildly. But other insects, so less industrious, cannot be ignored however much we may wish to shun them. They are not black flies or mosquitoes, or the kind one can swat either, but those whose ravages extend to plague proportions and which unfold havoc in garden, orchard, field and forest. As Mr. Leslie Emsal puts it, we have to contend with insects that suck, bite and sting, fly, crawl, skip and hop and must step lively to keep a jump ahead of them. On the principle that "big flies have little flies on their backs to bite 'em," little flies have lesser flies, and so ad infinitum. Parasitic insects have been imported for the purpose of preying on the predatory insects or their larvae. These means are being employed in the fight against the European corn borer and the spruce sawfly which cannot be tackled successfully with poison sprays.

The Toccin Sounds West Upbeat Fight on Grasshoppers, heads a great report from Regina which states that 37 carloads of bran, 56 carloads of sawdust and 10,000 gallons of sodium arsenite are being distributed in the affected areas of Saskatchewan and Alberta, respectively. By are experimenting this year with sodium fluorosilicate and another substance, known as A-23, in comparison with sodium arsenite, in the poison bait.

"That bank loan was a real help and the securities are still our own"

Good sound securities often represent the personal savings of years. It is not necessary to part with them in order to raise money for an emergency, to finance a major purchase, and for other temporary purposes.

If ready funds are needed, such securities can be used to secure a loan with the bank; the loan can be repaid by regular installments out of income and the securities are returned to the owner intact when the loan is repaid.

Branch Managers of The Royal Bank are always glad to discuss such personal loans with responsible men and women.
